Rahim Uddin

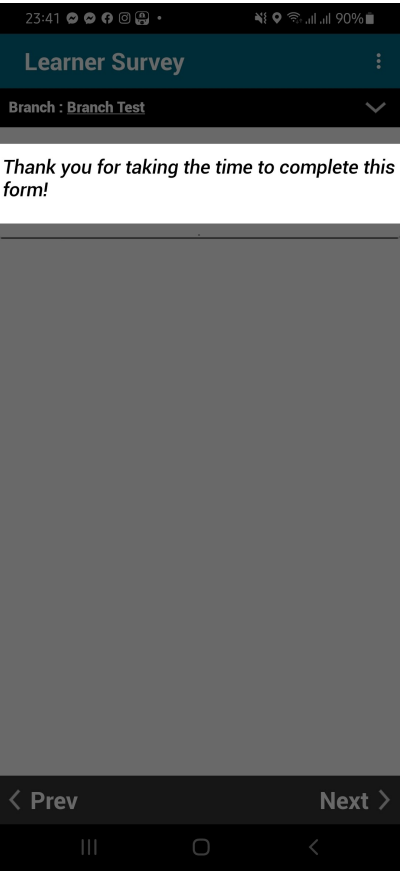

When the location is found, the dialog box will show the location and the accuracy. The user can then tap 'Record Location' or 'Find Location' to save the location or keep searching for greater accuracy. The dialog box will also show the location and the accuracy.

The dialog box will also show the location and the accuracy. The user can then tap 'Record Location' or 'Find Location' to save the location or keep searching for greater accuracy. The dialog box will also show the location and the accuracy.

When the user clicks on the 'Replace Location' button, the app displays the current GPS location details in a modal dialog. The details include the latitude, longitude, altitude, and accuracy of the location. The user can then choose to either replace the location or cancel the action.

When the user clicks on the 'Next' button, the app displays a 'Task is Completed' message. The user can then choose to either go back to the previous screen or proceed to the next screen.
